MBG

MASTER BOARD GAME

INSPIRE TO LEARN

PARTICIPATE

Participating in the "Master Boarding Game" developed by the "IBDL" learning group helps participants keep up with the continuous development in the business world.

Game Time

6 hours

full day of training

Tools and Resources

- Trainers to lead the game.
- Game tools owned and provided by IBDL
- Audio and visual tools for display during the game.

How to play?

- Participants are divided into teams, with each team representing a branch of one of the companies.
- Each team takes over the management of the branch for a certain period of time with the aim of achieving the purpose requested by the leader through planning and role distribution within the team and many other skills.
- The trainer changes the game environment in order to explore new skills in the participants.

EXPLORE

Exploring the skills of the work team in your institution through the game can help them develop leadership skills, decision-making abilities, conflict resolution strategies, as well as planning, collaborative, and creative skills that they need for success in business management. They will also gain skills in challenge, adventure, and stress tolerance, and understand the impact of power on their team.

DEVELOP

Developing your team's abilities through the game will enhance their skills in many areas related to business management such as leadership, motivation, risk-taking, planning and organization, resource utilization, analysis of the competitive environment, decision-making, negotiation and conflict resolution skills, interaction and collaboration, innovation and creativity, in addition to gaining skills on how to control themselves under the influence of power.
